

HORIZONTAL DISCHARGE ROOF EXHAUST FAN

TCF Series GMC REF – 555:

Roof unit horizontal outlet

Application :

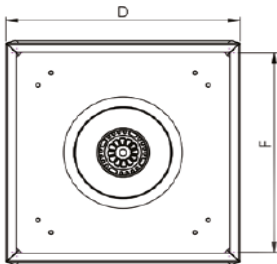

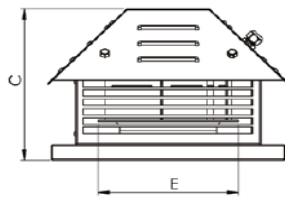

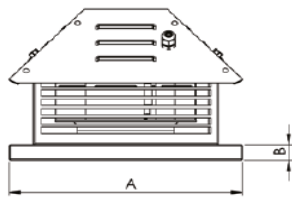

- Horizontal Discharge Roof Exhaust Fans are designed to providing the needs of the ventilation of Cafe's, Kitchens, Markets, Sport centers, dining halls, toilets as well as industrial, residential, and commercial constructions.
- Our product range comprises 9 models of size known as 190, 225, 250, 280, 355, 400, 450, 500, 560 and air flow ranges between 560 to 10.000 m³/h.
- in accordance with TS EN 60335-1 and TS EN 60335-2-80 standards.

Composition :

- The case is made from galvanized steel plate and painted with RAL 9002 electrostatic paint.
- The air inlet grill located at the roof is prevented from warm up of the engine.
- Compact design allows to users for easy installation.
- Due to its removable roof, it can be manipulated to the fan and engine.
- it ensures an opportunity that easy installation to the rectangular and round ducts.
- Through its external rotor fan and aerodynamic case structure, it runs at high efficiency and low decibels.
- Through its protecting plate, when the Fan runs, the any kind of foreign objects treatments will be prevented.
