

SPEED-CONTROLLED, WALL TYPE AXIAL FAN

GMC AXF-606:

Axial wall fan

Application

- Combined supply and extract ventilation systems of premises for different destinations, where a high air flow capacity are required at relatively low resistance of the system
- Application in the motors of ball bearings provides a long servicelife (40 000 hours)
- Can be used for the direct ejection of the exhaust air or static suction head ventilation in fire-prevention ventilation systems
- Air flow direction: from impeller to motor (rotation direction cannot be changed)
- Installation: built-in all directions

Composition

- The fan case and the impeller are made of steel body with polymeric covering
- Terminal box has a cord for remote connecting
- Two- and four-pole of one- or three-phase asynchronous motors equipped with built-in thermal protection on automatic restart are used
- Class of motor protection is IP 44
- Speed controllable

Options

- Motor options:
- 2 = 2 Poles
- 4 = 4 Poles
- M = one phase
- T = three phase

Accessories

- Speed controller type **STL**, **MTY** and **BTRN**
- Backdraught shutters **VK**
- Safety guard **BSV**

SPEED-CONTROLLED, WALL TYPE AXIAL FAN

Order example

- AXF-606: Mk.300 4M + MTY1
- **Mk.300** = flange diameter
- **4** = 4 poles
- **M** = one phase, **T** = three phases
- **MTY** = speed controller
